

MALDI-80x0 information notice

Last updated: [05/09/2025]

The following information is provided for users who may eventually conclude contracts for purchase, rent or lease **MS Instruments** provided by Shimadzu Corporation ("Shimadzu", hereinafter also referred to as "the Company", "we" or "us").

MS Instrument list

MALDI-8020	MALDI TOF Mass Spectrometer
MALDI-8030	MALDI TOF Mass Spectrometer
MALDI-8020 EasyCare	MALDI TOF Mass Spectrometer
MALDI-8030 EasyCare	MALDI TOF Mass Spectrometer

I. Definitions

The following definitions apply throughout this document:

- **'Connected product'** is an item that can generate, obtain, or collect data about its use, performance, or environment and that can communicate this data via a cable-based or wireless connection except for an item whose primary function is the storing, processing, or transmission of data on behalf of any party other than the user.
 - **MS Instrument** is a device (hereinafter referred to as "The Device") sold, rented, or leased by [Shimadzu] or its business partners which are equipped with [MALDI Solutions software] provided by Shimadzu.
- **'Related service'** is a digital service that can be linked to the operation of a connected product and that affects the functionality of this connected product, for instance by transmitting data or commands to it.
 - [MALDI Solutions software]
- **'User'** is a natural or legal person that owns a connected product or to whom temporary rights to use that connected product have been contractually transferred, or that receives a related service.
 - This will usually be the person or company who bought, rented, or leased the connected product from Shimadzu or one of its business partners.
- **'Data holder'** means a natural or legal person that has certain rights or obligations, in particular in accordance with the EU Data Act, to use and make certain data available, which can include product data and related service data.
 - For details on the identity of data holder see below (Identity of the prospective data holder).
- **'Product data'** means certain data obtained, generated, or collected by a connected product which relates to its performance, use or environment and is designed to be retrievable by a user,

data holder or other third party.

- For details on relevant product data see below.
- **‘Related service data’** means certain data representing user action, inaction and events related to the connected product during the provision of a related service.
 - For details on relevant related service data see below.
- **‘Readily available data’** means product data and related service data that a data holder lawfully obtains or can lawfully obtain from the connected product or related service, without disproportionate effort going beyond a simple operation.

II. Information about connected products.

Type of product data: Mass spectrometry data	
Matter	Details
1. More detailed types of product data which the connected product is capable of generating.	• Time-of-flight mass spectra generated from matrix assisted laser desorption ionization (MALDI). • Laser intensity • Instrument tuning identifier • Sample location
2. Format of product data which the connected product is capable of generating.	Binary data (Kratos proprietary format)
3. Estimated volume of product data which the connected product is capable of generating.	Mega bytes.
4. Is the connected product capable of generating data continuously and in real-time?	Not continuously, but real-time.
5. Is the connected product capable of storing data on-device or on a remote server?	Stored on The Device and on a remote server.
6. Intended duration of retention of the data.	Until updated using related services.
7. How may users access, retrieve or erase the data?	Via the GUI of The Device.

Type of product data: Instrument status	
Matter	Details
1. More detailed types of product data which	Voltages, pressures, temperatures, digital

the connected product is capable of generating.	sensor outputs, which are stored in time stamped blocks.
2. Format of product data which the connected product is capable of generating.	Binary data (Kratos proprietary format)
3. Estimated volume of product data which the connected product is capable of generating.	All items are 8 bytes, except digital sensor output which are 4 bytes.
4. Is the connected product capable of generating data continuously and in real-time?	Continuously in real-time.
5. Is the connected product capable of storing data on-device or on a remote server?	Data is stored on The Device or remotely.
6. Intended duration of retention of the data.	Until the end user decides to delete the data.
7. How may users access, retrieve or erase the data?	Data is accessed, retrieved, or erased using the MALDI Solutions software.

Type of product data: Information on the installation of the system	
Matter	Details
1. More detailed types of product data which the connected product is capable of generating.	Standard Microsoft Windows Installer information.
2. Format of product data which the connected product is capable of generating.	Binary (Microsoft proprietary).
3. Estimated volume of product data which the connected product is capable of generating.	Kilo bytes.
4. Is the connected product capable of generating data continuously and in real-time?	Neither.
5. Is the connected product capable of storing data on-device or on a remote server?	Data is stored on The Device.
6. Intended duration of retention of the data.	Until the end user decides to uninstall MALDI Solutions.
7. How may users access, retrieve or erase the data?	Microsoft Windows system administration tools.

III. Information on the related services

Matter	Details
1. Nature and estimated volume of product data that the prospective data holder is expected to obtain.	The same types and estimated volumes of product data as described in section II. above.
2. Collection frequency of product data that the prospective data holder is expected to obtain.	Data can be obtained real-time at a regular interval, or at once at some arbitrary time as required by the data holder.
3. Arrangements for the user to access or retrieve such product data, including the prospective data holder's data storage arrangements and the duration of retention.	Data is accessed via MALDI Solutions software. Data can be converted to printed or proprietary data formats. The duration of retention if data is decided by the end user.
4. Nature of related service data to be generated.	N/A
5. Estimated volume of related service data to be generated.	N/A
6. Arrangements for the user to access or retrieve such related service data, including the prospective data holder's data storage arrangements and the duration of retention.	N/A
7. Does the prospective data holder expect to use readily available data itself and the purposes for which those data are to be used?	Shimadzu uses readily available data for the purposes specified in the contract concluded between Shimadzu and the user regarding access to and use of data related to products and related services.
8. Does the prospective data holder intend to allow one or more third parties to use the data for purposes agreed upon with the user?	Shimadzu intends to allow third parties to use the data for the purposes specified in the contract concluded between Shimadzu and the user regarding access to and use of data related to products and related services.
9. Identity of the prospective data holder and other data processing parties.	Shimadzu Corporation Nishinokyo Kuwabara-cho, Nakagyo-ku, Kyoto 604-8511, Japan
10. The means of communication which make it possible to contact the prospective data	Please contact your local Shimadzu representative.

holder quickly and communicate with that data holder efficiently.	
11. How can users request that data is shared with a third party and, where applicable, end the data sharing?	Please contact your local Shimadzu representative.
12. The user's right to lodge a complaint alleging an infringement of any of the provisions of Chapter II of the Data Act with the competent authority.	The users have the right to lodge a complaint against an infringement of any of the provisions of Chapter II of the Data Act with any competent authorities in the EU.
13. Whether a prospective data holder is the holder of trade secrets contained in the data that is accessible from the connected product or generated during the provision of a related service, and, where the prospective data holder is not the trade secret holder, the identity of the trade secret holder.	Data disclosed data do not contain trade secrets.
14. The duration of the contract between the user and the prospective data holder, as well as the arrangements for terminating such a contract.	Please refer to the contract for details on the effective durations and procedures for termination.
