Mobile C-arm Imaging System list

OPESCOPE ACTENO	Mobile C-arm imaging system
-----------------	-----------------------------

### I. Definitions

The following definitions apply throughout this document:

- **‘Connected product’** is an item that can generate, obtain, or collect data about its use, performance, or environment and that can communicate this data via a cable-based or wireless connection except for an item whose primary function is the storing, processing, or transmission of data on behalf of any party other than the user.
  - **[Mobile C-arm Imaging System]** sold, rented, or leased by [Shimadzu] or its business partners which are provided by Shimadzu.
- **‘Related service’** is a digital service that can be linked to the operation of a connected product and that affects the functionality of this connected product, for instance by transmitting data or commands to it.
- **‘User’** is a natural or legal person that owns a connected product or to whom temporary rights to use that connected product have been contractually transferred, or that receives a related service.
  - This will usually be the person or company who bought, rented, or leased the connected product from Shimadzu or one its business partners.
- **‘Data holder’** means a natural or legal person that has certain rights or obligations, in particular in accordance with the EU Data Act, to use and make certain data available, which can include product data and related service data.
  - For details on the identity of data holder see below (Identity of the prospective data holder).
- **‘Product data’** means certain data obtained, generated, or collected by a connected product which relates to its performance, use or environment and is designed to be retrievable by a user, data holder or other third party.
  - For details on relevant product data see below.

- **‘Related service data’** means certain data representing user action, inaction and events related to the connected product during the provision of a related service.
  - For details on relevant related service data see below.
- **‘Readily available data’** means product data and related service data that a data holder lawfully obtains or can lawfully obtain from the connected product or related service, without disproportionate effort going beyond a simple operation.

## II. Information about connected products.

Type of product data: Equipment Operation Information	
<u>Matter</u>	<u>Details</u>
1. More detailed types of product data which the connected product is capable of generating	Operation Log, Activity History, Exposure Log, Error Log
