Safety Data Sheet (SDS)

· · ·	, E	ffective Date: September 1, 2014
1. IDENTIFICATION OF TH	E SUBSTANCE/PREPARATION AND COMPANY/U	NDERTAKING
Material Name	: SHELL ALVANIA EP GREASE R000,R00,R0,1,2	
Recommended Use	: Lubricating grease.	
Manufacturer/Supplier	: Showa Shell Sekiyu K.K.	
	3-2, Daiba 2-chome, Minato-ku, Tokyo, 135-8074, Jap	ban
Telephone/Fax	: Refer to end of this document.	
Emergency Telephone	: Refer to end of this document. (Japanese office hours	s only)
Number	Technical Support Team, Lubricants & Bitumen Divisi	on
SDS Code	: 613131	

2. HAZARDS IDENTIFICATION GHS Classification : Long-term hazards to the aquatic environment: Category 3 **GHS Label Elements** Symbol(s) : No symbol Signal Words : No signal word Hazard Statement : H412: Harmful to aquatic life with long lasting effects **GHS Precautionary Statements** : P273: Avoid release to the environment. Prevention Response : No precautionary phrases. Storage : No precautionary phrases. Disposal : P501: Dispose of contents/container to appropriate waste site or reclaimer in accordance with local and national regulations. : Please see Chapter 4 - 8 before use for Prevention/Response/Storage/Disposal. not result in Used oil may contain harmful impurities. classification

3. COMPOSITION/INFORMATION ON INGREDIENTS

3. COMPOSITION/INFORMA	ATION ON INGREDIENTS
Substance or Mixture	: Mixture
Chemical Description	: Lubricating grease.
Component Information	: Lubricant base oil 85-95%
	Grease thickner (Lithium soap) ≤10%
	Additives 5-10%
Chemical Formula	: Not possible to define.
CAS registry number	: Trade secret
Additional Information	: The highly refined mineral oil contains <3% DMSO-extract, according to IP346.
Pollutant Release and Tran	sfer : Not applicable
Register (PRTR) Law	
Industrial Safety and Healt	h : Article 57-2(Delivery of Documents)/No.168 Mineral oil 80-90%
Law	
Poisonous and Deleterious	s : Not applicable
Substance Control Law	
Classification of componer	nts : [Chemical Identity/Hazard Class (category)/Hazard Statement/Conc.]
according to GHS	Zinc alkyl dithiophosphate/Skin Irrit. 2, Eye Dam. 1, Aquatic Chronic
	2/H315,H318,H411/1-2%
	Zinc oxide/Aquatic Chronic 1/H410/0.1-0.9%
	Zinc naphthenate/Skin Irrit. 2, Eye Irrit. 2, Aquatic Chronic
	1/H315,H319,H410/0.1-0.9%
4. FIRST AID MEASURES	
General Information	: Not expected to be a health hazard when used under normal conditions.
Inhalation	: Remove casualty to fresh air and keep at rest in a position comfortable for breathing.
	Cover with blanket to keep warm and rest in a quiet surrounding. Seek immediate
	medical advice and attention.
Skin Contact	: Wash skin with large amount of water using soap.
Eye Contact	: Rinse cautiously with clean water for several minutes. Remove contact lenses, if
	present and easy to do, and continue rinsing. After rinsing for a minimum of 15
	minutes, seek medical advice and attention.
Ingestion	: Without inducing vomiting, call a doctor for treatment. If mouth has been dirtied, clean
	with water.
Most Important	: If swallowed, may irritate mucous membrane of stomach and induce vomiting.
Symptoms/Effects, Acute	Inhalation if mist may cause feeling ill. Skin contact and eye contact may cause
& Delayed	irritation.
Immediate Medical	: Treat symptomatically. Call a doctor or poison control center for guidance.
Attention, Special	
Treatment	

Clear fire area of all non-emergency personnel.

Suitable Extinguishing Media	: Concentrated strong liquid in mist and powder forms, carbon dioxide and foam. Use powder and carbon dioxide may be used small fires only. Effective to use foam to shutdown the air in a large fires.
Unsuitable Extinguishing Media	: Do not use water in a jet.
Specific Hazards Arising from Chemicals	: Hazardous combustion products may include: A complex mixture of airborne solid and liquid particulates and gases (smoke). Carbon monoxide. Unidentified organic and inorganic compounds
Fire fighting instructions	: Water the surrounding equipment to cool them down. Cordon off the affected place and its vicinity to all, except the concerned parties.
Protective Equipment & Precautions for Fighters	: Ensure to wear protective equipment and approach from windward.

6. ACCIDENTAL RELEASE MEASURES

Avoid contact with spilled or released material. For guidance on selection of personal protective equipment see Chapter 8 of this Material Safety Data Sheet. See Chapter 13 for information on disposal. Observe the relevant local and international regulations. Personal Precautions, : Avoid contact with skin and eyes. Prepare suitable equipment and materials. **Protective Equipment and Emergency Procedures** Environmental : Use appropriate containment to avoid environmental contamination. Prevent from Precautions spreading or entering drains, ditches or rivers by using sand, earth, or other appropriate barriers. In event of entering in the sea, extend oil fences to prevent from spreading, and sop up with absorbent materials. Use chemicals and/or detergents, they must satisfy technical standards as set by the Ministry of Land. Infrastructure and Transport / Ministry of the Environment. Promptly remove all ignition sources and stop leakages. In a small leakage, absorb Methods and Material for and recover by use of soil, sand, sawdust and waste clothes. In a large leakage, **Containment and Clean** cordon off the danger zone, prevent from entering and enclose it with sand bank and Up stop outflow. Cover liquid surface with foam, and recover liquid into containers. Additional Advice : Local authorities should be advised if significant spillages cannot be contained. 7. HANDLING AND STORAGE HANDLING **Technical Measures** : In handling this material over the allocated volume, ensure approval to meet requires of the laws. Keep away from heat, sparks, open flames, hot objects. No smoking. Take measures against static discharge. Ensure to wear clothing and shoes made of conductive materials. When fixing or processing machine, it carries out after removing dangerous objects completely. NEVER suck up (siphoning) this material by mouth. Wear suitablel protect equipment if skin or eve contact may cause. Seal containers hermetically without handling in violent such as falling, dropping, or jolting. Ventilation Precautions : see Chapter 8 **Precautions for Safe** : Use under normal temperature. Prevent from mixing water and impurity. Avoid contact Handling with halogens, strong acids, alkali and oxidizing materials. STRAGE **Conditions for Safe** : Keep containers tightly closed and in a cool, well-ventilated place away from direct sunlight. It is recommended to lock up storage area. Use properly labelled and Storage closeable containers. Avoid heat, sparks, open flame and static accumulation. **Technical Measures** : All electrical appliances shall be explosion-proof types, and they all must be earthed. : Avoid contact and storage in same place with halogens, strong acids, alkali and **Precautions for Safe** Stroage oxidizing materials. Recommended : Storage in original containers. Do not pressurize empty containers. May cause Materials rupture. Do not weld, heat up, drill or cut containers. May ignite the residue and cause explosion.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

If the American Conference of Governmental Industrial Hygienists (ACGIH) value is provided on this document, it is provided for information only. Equipment : Seal or install ventilations for mist occurs. Install eye shower and body shower near working site. **Standard Concentration** : Not specified Control : Japan Society for Occupational Health(2012)⁽¹⁾ 3mg/m³ (Oil mist, mineral) **Occupational Exposure** 5mg/m³ (Oil mist, mineral) Limits ACGIH(2012) TWA[Inhalable fraction.]⁽²⁾ **Protective Equipment** : Skin protection not ordinarily required beyond standard issue work clothes. **Respiratory Protection** : No respiratory protection is ordinarily required under normal conditions of use. Use appropriate equipment in response to the circumstances.

Hand Protection
Eye Protection
Skin and Body
Protection
Appropriate Sanitary
Measures:

: Remove immediately all contaminated clothing. Contaminated clothing must be laundered before reuse.

: Use oil-proof protective hand gloves under prolonged or repeated skin contact.

Wear safety glasses or full face shield if splashes are likely to occur.
Use oil-proof/long sleeved clothing under prolonged usage.

9. PHYSICAL AND CHEMIC		
Physical state		: Semi-solid.
Colour		: Light yellow.
Odour		: Characteristic mineral oil
рН		: Not applicable.
Initial Boiling Point		: Expected >250°C
Pour point		: < Data not available°C
Flash point		: ≥ 200°C (SETA)
Upper / lower Flammability	<pre>/ or Explosion limits</pre>	: Typical 1 - 7 %(V) (based on mineral oil)
Auto-ignition temperature		: Data not available. Expected >320°C
Density		: Approx. 0.9g/cm ³ (15°C)
Solubility		: Water: Negligible. Other solvents: Data not available
Decomposition Temperatu	ire	: Data not available
Vapour pressure		: Data not available
Vapour density	oofficient (les Deus)	: Data not available. Expected >1
n-octanol/water partition c	oefficient (log Pow)	: Data not available
Evaporation rate		: Data not available
10. STABILITY AND REACT	Ινιτγ	
Chemical Stability	: Stable under norma	
Hazardous Reactivity	: Avoid contact with s	
Conditions to Avoid	: Avoid contact with n	alogens, strong acids, alkalis, and oxidizing materials.
	: Data not available.	
		osition products are not expected to form during normal storage.
Products	Generates smoke, c	arbon monoxide, sulfurous acid gas etc. during combustion.
11. TOXICOLOGICAL INFO	RMATION	
Basis for Assessment		ased on data on the toxicology of lubricant base oil. Toxicological
		t is not available. Components contained above cut-off value is
	described on Chapter	
Acute Toxicity	1 Oral	Expected to be of low toxicity: $LD_{50} > 5000 \text{ mg/kg}$, $Rat^{(3)}$
·····,	2 Dermal	Expected to be of low toxicity: $LD_{50} > 5000 \text{ mg/kg}$, Rabbit ⁽³⁾
	3 Inhalation(Vapour)	Data not available
	4 Inhalation(Mist)	Low toxicity: $LC_{50} > 5 mg/l$, 4h, $Rat^{(3)}$
Skin Corrosion/Irritation	: Not classified as a s	Low toxicity: $LC_{50} > 5 mg/l$, 4h, $Rat^{(3)}$ kin irritation (rabbit test). ⁽³⁾ Prolonged/repeated contact may cause
	defatting of the skin	which can lead to dermatitis.
Serious Eye		eye irritation (rabbit test). ⁽³⁾
Damage/Irritation		
Respiratory or Skin		oncerning respiratory sensitisation.
Sensitisation		kin sensitisation (Buehler test; guinea pig). ⁽³⁾
Germ Cell Mutagenicity	: The mutagenic pote	ntial of the product category 'other lubricant base oils' has been
		in a range of "in vivo" and "in vitro" assays. The majority of the
	studies showed no e	
		evidence of mutagenic activity. ⁽³⁾
Carcinogenicity	: Product contains mi	evidence of mutagenic activity. ⁽³⁾ neral oils of types shown to be noncarcinogenic in animal skin-

Basis for Assessment

Ecotoxicological data have not been determined specifically for this product. Information given is based on a knowledge of the components and the ecotoxicology of similar

	products. Components contained above cut-off value is described on Chapter 3.
Caution	: Poorly soluble mixture. May cause physical fouling of aquatic organisms.
	The Water Accommodated Fraction (WAF) is applied following tests
Toxicity	: Fish(Fathead minnow, 96h) LL_{50} >100mg/L ⁽³⁾
	: Fish(Fathead minnow, 14d) NOEL >100mg/L ⁽³⁾
	: Crustacea (Daphnia magna, 48h) EL ₅₀ /NOEL >10,000mg/L ⁽³⁾
	: Crustacea (Daphnia magna, 21d) NOEL >10mg/L ⁽³⁾
	: Algae(Pseudokirchneriella subcapitata) NOEL >100mg/L ⁽³⁾
	: In a static 4-day microorganism luminescence inhibition study, no significant
	luminescence inhibition was observed. ⁽³⁾
Acute Aquatic Toxicity	: Not expected to be a hazard.
Chronic Aquatic Toxicity	: Not expected to be a hazard.
Mobility	: Generally floats on water.
-	: Lubricating oil components have estimated log Koc >3, indicating these components
	are likely to be adsorbed onto soil and sediment and are not likely to leach to ground
	water.
Persistence/degradability	: Another lubricant base oil was determined to be inherently biodegradable but not
6 ,	readily biodegradable, with a mean degradation of 31% by day 28.
Bioaccumulative Potential	: Not available as highly refined base oil.
Hazardous to ozone layer	: Not classified because this product not contained substances listed on Montreal
······································	Protocol and Ozone Laver Protection Law.

Material Disposal 1 Waste disposal yourself or entrust the industrial waste treatment compared obtained the prefectural governor's permission or municipal corporation should be in accordance with applicable regional, national, and local law regulations.	
	2 Do not dispose into the environment, in drains or in water courses.
	3 For landfill disposal, destroy by fire and confirm cinders agreed to Waste Disposal

Law.4 In event of burning this material, ensure to carryout work in safe place with guards in position, and select a method that would not cause any harm or damage to others

Container Disposalduring combustion or explosion.: Purify and recycle or performs suitable disposal in accordance with the standard of
related laws and regulations. Disposal with remove content completely.

14. TRANSPORT INFORMATION

		II	
Internatio	onal Restriction		
UN Cla	SS	:	Not applicable.
UN Nur	nber	:	Not applicable.
Other I	nformation	:	This material is not classified as dangerous under IMDG/IATA regulations.
Domestic	Restriction	:	Since domestic laws and regulations shown below are applicable, containers and transportation methods shall be required to follow each and every regulation.
Land	Fire Service Law	<i>'</i> :	Not considered as dangerous goods.
	Container:		If product classified as dangerous goods, use containers (other than tanker, tank car and tank truck) for transportation usage, shall meet the Clause 2, Notice Attachment 3, concerning dangerous materials.
Sea		:	Ship Safety Law: Not Dangerous Goods.
Air		:	Civil Aeronautics Act: Not Dangerous Goods.
Specific s	safety measures	1	Caution: Flammable.
and cond	litions for	2	Transport remarkably with containers may not cause friction or agitation.
transport	ation		Display signage on vehicle and provide with fire fighting equipment, if and when required to transport more than the specified quantity. Total piled height of vehicle shall be less than 3 meters.
		4	Consolidation of this material with dangerous goods belonging to the 1st and 6th Classification is prohibited.

5 Abide by other laws and regulations that are applicable.

15. REGULATORY INFORMATI	ON
International Information	
EINECS/ELINCS (EC)	: All components listed or polymer exempt.
TSCA (USA)	: All components listed or in compliance.
METI (JAPAN)	: All components listed or in compliance.
Domestic Information	
Fire Service Law	: Not considered as dangerous goods.
Pollutant Release and	: Not applicable
Transfer Register (PRTR)	
Law	

Industrial Safety and Health Law	: Article 57-2(Delivery of Documents)/No.168 Mineral oil 80-90%
Poisonous and Deleterious Substance Control Law	: Not applicable
Marine Pollution Protection	: Waste Oil Regulation.
Sewage Control Law	: Mineral Oil Disposal Regulation. (5mg/L)
Water Pollution Prevention	: Oil Disposal Regulation. (5mg/L)
Waste Disposal and Public Cleaning Law	: Industrial Waste Regulation.
